

3.3 Area is missing like 1 qm

4. maybe different Headline → Maybe just Terrain Compatibility

5.1 Instead of Autonomous operation → Cordless operation

10.1 is that enough?

~~In 3.1~~ In 1.X What width of the ditch/hole should it overcome ?

Any german safety certification required ? TÜV, CE, GS, Gutachten von z.B. Intertek

Some more of my notes:

- The robot should cut off and transport away the plants
- The robot should spray the plants with weed remover, so they die
- Robot is only allowed to remove up to XXXXqm of soil or XXXX Kg
- Robot should be able to get over stones of XXXXcm
- Robot should be able to be water resistant lie IPXXX
- Robot should not have any wires or loops sticking out <XXXcm
- Robot should get over ditches of <XXXcm
- Robot should be able to drive through gras/bushes <XXXcm
- Robot must be able to detect persons within a radius of <XXXm
- The Robot should not cost more than XXXX€
- The Robot should be within the dimension of:
- The Robot should not be heavier than:
- The Robot should be able to cut??? Plants up to <XXXcm
- The robot should be able to navigate by it self
- The software Should be used
